### WHEAT MARKET STRONG FIRST DAY OF ON RUSH TO BUY IN

tirely Due to Reports of Damage From Northwest.

CHICAGO, Aug. 3.—The opening in the wheat market was strong, apparently all commission houses having seemingly unlimited orders to buy wheat. The result was a wide fluctuation in the initial quotations, the prices in some instances rising more than 2 cents above Saturdsy's closing figures. The new crop months showed the greatest advances. From a light recession, owing to profit-taking, prices again advanced toward the end of the first quarter until May touched \$1.012. December 974c and September 945c.

The bullish sentiment was entirely due to the news from the Northwest, where the new crop is said to be in serious condition owing to black rust and high temperatures. One report claimed that the black rust bilght has appeared in the wheat fields of Manitoba, and revised estimates have cut down the yield of spring wheat from 25 to 40 per cent. Realizing sales quieted the market toward midday, but prices were well maintained throughout the remainder of the session. The market closed strong. September opened a second to 941c and closed at 943c. December closed at 964c and May at \$1.005.

The corn market also opened excited and strong, owing to the continuance of excessively high temperatures over the greater portion of the corn belt. Reports from central Illinois asserted that the new crop was beginning to "fire" owing to the hot, dry weather. This news brought

from central Illinois asserted that the new crop was beginning to "fire" owing to the hot, dry weather. This news brought out additional buying orders soon after the opening. Trade continued extremely active all day and despite liberal profittaking the market held strong. The market closed strong, with prices near the top. September opened lie to tie higher, at 76ic to 76ic, sold between 76@76ic and closed at 76ic. December closed at 65ic and May at 65ic.

Oats displayed considerable buillishness because of the hot weather in the Northwest, but the market was much quieter than in wheat and corn. The greatest strength and activity was in the distant deliveries. September opened 1@ic to 1@ 1c higher at 45ic to 46c, sold at 45ic and closed at 45ic. Local receipts were 257 cars.

Provisions were weak at the outset, owing to a 5@10c decline in live hogs. The close was firm, with September pork up 25c. Lard was up 75c and ribs were unhanged

#### Are Your Surplus Funds at Work?

If not, do not let them remain idle another day. Industry and saving are sure to bring their reward, and regular deposits in the Commercial National Bank a liberal return in Interest.

Bullish Sentiment Almost En- Cantaloupes Are on the Shelves in Plenty; the Fruit Season.

As is always the case on the first day of the week, produce dealers had plenty of spare time on their hands Monday. The demand for all lines of eatables was very light, nothing new made an appearance, and quotations virtually remained unchanged. One dealer spoke of the situation this way: "Well, it's the same old story; nothing doing. But one can't expect to do much business when everybody in the town is out at the lake and Lagoon.

Cantaloupes are now coming in very freely, but there is no indication that there will be any decrease in the price, in spite of the fact that the demand for the product is very weak. Watermelons still remain at 3 cents a pound, but the housewife does not consider this such a high price now as she did a week ago, as the melons are thoroughly dipe, and as she terms it "fit to be eaten." There has been a big increase in the supply of the fruit during the last few days, and this is having a bad effect on the sale of cantaloupes. Watermelons arriving from the Golden State are far superior to those which have been coming in from Texas.

The season for raspberries is beginning

The season for raspberries is beginning to decline, and the dealers declare that housewives, who wish to put up a winter supply of the fruit, ought to do so as soon as possible, as it will not be long before it comes to a close.

Visible Grain Supply.

NEW YORK, Aug. 2.—The visible sup-ply of grain Saturday, August 1, as com-piled by the New York produce exchange, was as follows: Wheat, 16,174,000 bushels; decreased, Corn, 2,078,000 bushels; decreased 456,-Oats, 1,520,000 bushels; increased 35,-90. Rye. 100,000 bushels; decreased 36,000. Barley, 540,000 bushels; decreased, 174,-

ADDITIONAL MINING NEWS COLUMBUS ORE IS NOW GROWING BETTER

With a full face of ore, the width of the shoot remaining, yet an unknown quantity in the absence of a crosscut, the management of the Columbus Consolidated is pushing the drift on the 400-foot level into what has every appearance of being the best territory within that company's lines. President and General Manager Tony Jacobson spent Sunday at the mine in Alia, returning Sunday evening. He stated to The Tribune yesterday that the present developments promised much, and he convertible of the convertible of the coverage of the face to such an extent that it will take a crosscut to determine its width. The entire face is milling ore averaging \$20 per ton in silver, lead, gold and copper, while everything points to a steady improvement in value as work proceeds. The company is now operating the mill three shifts on this rock, and it will not be long now until the Columbus is marketing something like its old style. Mr. Jacobson desires to await more developments before saying too much about the present find, but that he is delighted with developments goes without saying.

#### RUMORS SAY NEWHOUSE MINE FAST IMPROVES

Every once in a while Western circles hear rumblings about new developments at depth of the Newhouse mine in Beaver county, but nothing official has been allowed to leak from the management for many months. It is understood that of late there have been some very graiffying developments on the 700-foot level, the level immediately below that of the main working tunnel, and it is said that the stope sheets show the rock to run 5 per cent or better. If true, this is a decidedly important change for the better.

it is said also that the management has placed the mill in shape for the most it is said also that the management has placed the mill in shape for the most thorough work of its history which is taken to mean here that the company is quietly but thoroughly placing the property and all its accessories in condition to reap the benefits of the boom in copper and copper stocks that is scheduled to occur during the fall. Local circles also expect soon to receive a statement from the company regarding the physical condition of the mine, for when the Western stockholders met with Mr. Newhouse several months ago, at which time Heber C. Wells was elected a director, Mr. Newhouse promised a full statement each three months thereafter. The first three months have expired, and for that reason a report is expected at any time.

#### GODIVA GOING FAST TO MUCH DEEPER LEVELS

The management of the Godiva Mining company is making splendid progress in getting below the 900-foot level. Up to date the triple-compariment shaft is 940 feet deep, and the rate of 90 feet of depth per month will not be considered extraordinary by the company. It is the intention to drive 300 or 400 feet deeper than the 900, and then to drift for the ore bodies had above. The company has ore developed on each level from the surface, and some of the rock is high grade. It was stated Monday, for instance, that on the 550-foot level ore was encountered that ran 1000 to 1500 ounces silver and two and a half ounces gold per ton. So the officials entertain no doubt of encountering resources at depth. The company has several leasers who are now working on shipping ore, while there are several applications for leases continually coming in. It is said that there has been a very significant change encountered in the formation in the shaft, and important disclosures are reasonable at any time. The management of the Godiva Mining

#### PHONOLITE ORE BODY GAINS WIDTH VERY FAST

A letter from the management of the Phonolite Paymaster company at Phonolite, Nev., brings good news to Salt Lakers interested. Last May this company was pushing the tunnel into four feet of gold ore. Now the vein has so widened that there are 15 feet available, the average value of which is \$29 and better per ton.

North Side Coeur d'Alene.

Herbert S, Auerbach, the well-known alt Lake mining engineer and manager of the Golden Chest Mining company of the Coeur d'Alene district of Idaho, has an interesting article in the Engineering and Mining Journal on the 11th of July, on the north side of the camp. Mr Auerbach is well calculated to describe the newly developing mineral wonders of this heretofore neglected portion of the great lead camp, as he has been the one man with courage enough to have faith in the north side, and to back it up with development werk. He has been very successful there. of the Golden Chest Mining company of

Mining Notes. Grant Snyder, manager of the Cliff Mining company, is at the mine in the Ophir district. A. E. Hadley, purchasing agent for the various Dern companies, has returned from his vacation. George E. Gunn. the well-known min-ing man, has returned from Idaho, wher-he reports the fishing ideal.

The Yampa Smelting company at Bingham will blow in the first blast fur-nace this morning, the new converter plant being scheduled to begin its task E. J. Raddatz has returned from a visit to the Stockton camp. He says that the Hunorine lessers are sending out frequent shipments of \$1409 to \$1509 per care ore and that the company should be making about the heat

and that the company should be making about the best money therefrom in its history. Bathing is superb at Saltair,
